

Bird Flu I Swab Sampling Kit

Bird Flu I Sampling Kit includes everything needed to collect, clean up and properly transport a viral sample. Kits are single use, individually numbered and sterile; quick and easy to use in any setting. Instruction card included in kit.

Customized kits are available to meet specific need of our clients.

Kit Components:

- Sterile swab
- Biohazard waste bag
- Specimen transport bag
- Bleach pack
- Nitrile gloves
- Instruction sheet
- Chain-of-Custody form

Bird Flu II Aspiration Kit

Bird Flu II Nasopharyngeal Aspiration Kit includes everything needed to collect, clean up and properly transport a viral sample. Kits are single use, individually numbered and sterile. Lubricant included in kit for patient comfort. Kit is designed to be used in a clinic or hospital setting by a physician or nurse.

Nasopharyngeal samples have a higher sensitivity for viral testing compared to a swab sample (according to the World Health Organization, a nasopharyngeal aspirate is the specimen of choice for respiratory viruses). Syringe is pre-filled with saline for quick sampling.

Kit Components:

- Saline syringe
- Viral transport vial
- Specimen transport bag
- Nitrite gloves
- Chain-of-Custody forms
- Biohazard waste bag
- Lubricant
- Tubing
- Bleach pack
- Instruction sheet

Bird Flu III

Environmental Feces Sampling Kit

Bird Flu III Environmental Feces Sampling Kit can be used in monitoring studies for Avian Influenza virus in wild bird populations. Kits are single use and easy to use; they can generate large sample numbers quickly. Sampling does not require handling or capturing animals.

Customized kits are available to meet the specific needs of our clients.

Kit Components:

- Specimen collection bag
- Specimen transport bag
- Tamper seal
- Instruction card
- Chain-of-Custody form
- Sample labels

Bird Flu IV

Environmental Water Sampling Kit

Bird Flu IV Environmental Water Sampling Kit can be used in monitoring studies for Avian Influenza virus in wild bird populations. The kit is used effectively to sample all or most birds present on a body of water and can collect up to 532 mL water sample; generating large sample numbers quickly. The kit is single use and easy to use. Sampling does not require handling or capturing animals.

Customized kits are available to meet the specific needs of our clients.

Kit Components:

- Specimen collection bag
- Specimen transport bag
- Tamper seal
- Instruction card
- Chain-of-Custody form
- Sample labels

Bird Flu V Human Stool Sampling Kit

Bird Flu V Human Stool Sampling Kit includes everything needed to collect a stool sample. Kits are single use and can be used at home, in a doctors office, at a medical clinic, or at a hospital. A detailed instruction sheet is included.

Customized kits are available to meet the specific needs of our clients.

Kit Components:

- Specimen collection toilet system
- Specimen transport bag
- Instruction Card

Bird Flu VI

Animal Blood Draw Sampling Kit

Bird Flu VI Animal Blood Draw Sampling Kit includes everything needed to collect a blood sample from a bird. Kits are single use and necessary components are sterile. Kits should only be used by qualified individuals properly trained to obtain a blood sample from a bird. Kit is easy to use in any setting.

Customized kits are available to meet the specific needs of our clients.

Kit Components:

- Specimen collection sheet
- Specimen transport bag
- Tamper seal
- Blood collection vials (SST & EDTA)
- Instruction card
- Chain-of-Custody form
- Gloves
- Syringe with needle
