

RAPSAK- Residue and Powder Sampling Area Kit

The QSA 700 RAPSAK is a small, light weight, field sampling kit for obtaining residue and powder samples. All components for collecting the sample are sterile and for single use. The kit allows for taking up to nine samples and includes a chain-of-custody form for each sample. A variety of tools for obtaining different size samples are included in the kit. Each kit is individually identified by a serial number.
